Company	BE Networks BV
Internet:	www.be-networks.be
Description	BE Networks is an active player in the circular economy of IT equipment. In the organically existing market of excess and obsolete IT assets, the company partners up with the world's largest ISP's on the supply side and end users of all industries on the demand side. It takes pride in our logistic expertise to collect and process IT equipment conform all regulations and partner-specific requests on the one hand and an innovative, fully ESD-proof refurbish process on the other hand. This combination results in our strong position as an independent supplier, offering exceptional rates and thus making high-end IT equipment accessible for all end users of all kinds and sizes. The largest volume the company trades in in Cisco & Juniper.
Meeting wishes	All end users with an autonomous IT procurement strategy and/or resellers or integrators with a recurring need for network- and datacentre equipment can benefit from our services. Purchasing managers are interesting to talk with about pricing- & budget issues, but also IT Managers and (solution) sales people or network design engineers are interesting to discuss actual need for products.

Company	Better Energy
Internet:	www.betterenergy.nu
Description	Better Energy strives to turn energy users into energy producers for their own usage: existing technology allows for production "behind the meter" by means of solar and/ or wind energy. Solar energy is rapidly moving towards integration into regular building components like roofing components and facade cladding. Due to the fact that energy markets were dominated by only a few producers just 20 years ago, countries have a variety of legislation in place to protect energy users. Such legislation now often hinders traditional users becoming energy producers and it is important to understand both threats and opportunities in every specific country.
Meeting wishes	Innovative building owners, construction companies, solar installers, parking lot owners.

Company	Dutch Chamber of Commerce for Belgium and Luxemburg
Internet:	www.nkvk.be
Description	The Dutch Chamber of Commerce for Belgium and Luxemburg (NKVK) has been promoting crossborder business within the Benelux for more than 115 years. Company	Modulo Milieustraten B.V.
Internet:	www.modulo-milieustraten.nl
Description	<p>Modulo Milieustraten develops and produces innovative, modular and circular recycling centres. Thanks to the flexible construction method, user-friendly recycling centres are built that can be adapted, removed, moved and reused over time. With maximum space utilization under the platform and minimal (capital) costs.</p> <p>A modular recycling centre must be adjusted every 10 years on average in connection with changes in legislation and regulations, developments and ambitions in waste separation and demographic developments. A recycling site must therefore be able to adapt to new developments. Via a flexible design it is possible to adapt the modular recycling centre according to environmental demands.</p> <p>With the Modulo innovative modular construction concept there is double ground use through the hollow underside of the platform. Rooms are used for the storage of waste and raw materials, sorting and processing of products and materials, repair of products, for office space, recycling activities, education space, start-ups and other circular activities. In addition to the circular flexible construction design, the construction itself is sustainable because the concrete elements are produced with secondary raw materials (eco granulates) and 100% reusable.</p>
Meeting wishes	City of Luxembourg - department "waste collecting (recycling) policy" Interested in future plans concerning recycling centers

Company	Plastic Recycling Van Werven B.V.
